Project description:

Our contract to form a new entrance to the Princes Mall Shopping Centre from the Princes Street concourse and install a new escalator between floors was let by our client Premier Property Group to provide greater prominence to an existing retail unit that was to be leased by a major high street brand.

The works required significant structural and mechanical and electrical alterations to be carried out within the busy mall above the food outlets sitting area, therefore to minimise disruption many of our activities were undertaken outwith the Malls operating hours.

The works were completed by finishing works including floor tiling, decoration and the fitting stainless steel balustrades and glass infill's.

Project:

Contract period: 12 weeks
Value: £467,750
