Edinburgh, EH14 5DE
Telephone: 0759 843 1674

Project description:

External envelope refurbishment to Grade A Listed Building. Works comprised repairs to existing church including stonework repairs and re-pointing, repairs to timber work to flat roof and renewal of lead roof coverings, renewal of rainwater goods generally, stripping and re-slating roof including laying under slate breathable membrane and carrying out any necessary repairs to timber sarking.

Contract also included minor structural strengthening works. Works also included major restoration and repairs to existing feature stain glass windows (17Nr.) including protective grille installations. The Cathedral remained operational for the duration of the works and required detailed planning to execute the works around major Christian Festivals. This required significant temporary hoarding within the cathedral to negate the ingress of dust (via negative pressure ventilation systems) and regular air monitoring tests.

Project:

Contract period: 44 weeks
Value: £358,000

Tradition. Expertise. Quality.
